

Paying premiums on a pre-tax or post-tax basis

Advantages for the employee of paying premiums on a pre-tax basis:

- Lowers taxable income which may result in savings
- Tax savings may help make the purchase of benefits more affordable

Things You Should Know:

- FICA taxes are taxes for social security and Medicare and are in addition to federal and state income taxes.
- Pre-tax premiums are paid before taxes are withheld, which lowers taxable income. You will not pay income and FICA taxes on the dollars used for your premiums.
- Post-tax premiums are paid after taxes are withheld. You do not receive a tax benefit on the dollars used for your premiums.
- If premiums are paid on a post-tax basis, benefits are not considered taxable income and a Form 1099 is not required.

Example of pre-tax savings:

Amanda earns a salary of \$1,500.00 every 2 weeks and purchases a dental plan.	Pay premiums with post-tax dollars	Pay premiums with pre-tax dollars
Gross pay	\$1,500	\$1,500
Pre-tax premiums	\$0	-\$50
Taxable income	\$1,500	\$1,450
Federal, State and FICA taxes	-\$236	-\$224
Post-tax premiums	-\$50	\$0
Take-home income	\$1,214	\$1,226
Savings per pay period with pre-tax premiums:		\$12
Annual savings with pre-tax premiums:		\$312
